

NASBTT Learn

Supporting your curriculum

NEW

Revamped and enhanced learning modules for trainees

NASBTT Learn, our successful learning platform for trainee teachers is getting an upgrade. As well as our popular training courses we are adding **24** new learning modules that map to the CCF and complement the **Mentor Development Modules**. We are also adding a new *Introduction to Teaching* course to help prepare trainees for their initial placement.

What's new

Expanded content - New learning modules examine key theories, explore classroom techniques putting knowledge into practice through scenarios and support for ITAP.

Aligned with the CCF - This set of modules is closely aligned to the CCF, addressing the key competencies and skills required for effective teaching.

Evidence base incorporation - Summaries of the evidence base in each new module offer trainees insight into up-to-date research and best practices underpinning the theory.

Curriculum integration - Modular format allows seamless integration of courses alongside your curriculum or to support trainees when needed.

Easy tracking - App provides the evidence you need to monitor trainee learning and meet Ofsted and Department for Education quality assurance.

Introduction to Teaching

This update will also include a new **Introduction to Teaching** programme. This course provides teachers with an introduction to the profession in preparation for their first weeks in school. A trainee's first half-term is demanding, and these five modules enable teachers to prepare effectively and gain confidence for the challenges and workload ahead.

The course will be available separately or as an extension of the standard licence.
